

Veotec Multi Stage Moisture Eliminator

This multiple stage moisture eliminator is the SE2 combined with bag type filters to achieve efficiencies to client specifications, but typically F7 - F9 for HVAC intakes, up to H10 - H12 for gas turbine intakes.

Multi Stage Moisture Eliminator

By combining the filtration into one package there can be a considerable space saving and easier maintenance access.

The filter holding frames are manufactured to provide a very cost effective method of refurbishing an existing system. For example, to replace a current Single Stage intake system with a Multi Stage intake system offering a higher level of protection in the same space.
