

Pressure Relief / Non Return Damper (PRD/NRD)

To maintain over pressure in areas or to avoid backflow in the system. These simple, efficient devices can be offered with a spring or weight kit.

The NRD and PRD are high integrity dampers designed to meet the demanding requirements of the HVAC markets where corrosion resistance, mechanical integrity and performance are primary factors.

The PRD is used to relieve pressure and the NRD is used to prevent backflow through ventilation duct systems and openings.

They are suitable for use in horizontal ducts or wall mounted and, in addition, the NRD can be mounted in a vertical duct with upward airflow only.

Technical Information

Minimum Size

8"W x 8"H x 8"/12"D

Maximum Size

79"W x 79"H x 12"D

Explosive Atmosphere

ATEX/IECEx SGS Baseefa/SGS Fimko Oy

Materials of Construction

Casing and Flanges:

Materials

Stainless Steel 304L/316L (1.4307/1.4404); Galvanised Sheet Steel (GSS), Carbon Steel (GAM)
Other Stainless Steel grades available on request

Thickness

Minimum 14G (at 8" deep), 11G or 6G thick (at 12" deep)

Fully welded Stainless Steel and GAM or welded and riveted Stainless Steel and GSS

Flange drilling detail to ISO 15138
Custom flanges as option

Blades:

Materials

Stainless Steel 304L/316L (1.4307/1.4404)
Other Stainless Steel grades available on request

Thickness

Single skin from 16G thick

Welded to tubular shafts

Shafts:

Ø12.7 mm (1/2") continuous tubular shaft in Stainless Steel 316/316L (1.4401/1.4404)

Bearings:

Oil impregnated sintered bronze. Low temperature option to -67°F and low leakage bearing assembly option available

Linkage:

Stainless Steel 316L (1.4404)
Link bars arranged to provide parallel blade motion

Blade Gasket:

EPDM (standard)
Elastomeric foam flame retardant (option)

Mechanical Options

The following options can be incorporated if required:

- Increased flange thickness
- Transitions; various options for fitting into circular ductwork
- Earth bosses
- Lifting lugs

Control Options

Spring or Weight kits are available for the PRD to control between 50-300 Pa (0.25" - 1.2" wg). Weight kits are available for the NRD to aid in counterbalancing the damper for the airflow. These are simple mechanisms that have no closed loop control.

Contact us to discuss your requirements.
